A multi-functional natural cosmetic powder

Microzest 25 rice is an extremely fine micronized rice powder with a silky touch. It presents many multifunctional properties thanks to its specific granulometric size dispersion.

Differentiate your colour-cosmetics with this natural ingredient and its multifunctional properties

With **Microzest 25 rice cosmetic powder,** you can easily develop unique applications that:

- absorb sebum
- improve the pressability when used in press powders
- improve the adherence on the skin (loose powders)
- improve the skin feel
- permit to obtain a non-greasy effect

> For make-up and skin care.

Solving formulation challenges

- **Microzest 25 rice** enables the powder to flow freely without agglomeration. Thanks to its easy dispersion, numerous cosmetic applications are possible (in skin care and make-up).
- Thanks to its starch composition, **Microzest 25 rice** brings a texturizing effect to the product.
- **Microzest 25 rice** brings smoothness to the final product.

Help to formulate organic products

The organic grade, **BioMicrozest 25** is a good help to follow the recommendations of Ecocert, BDIH, Soil Association, Natrue, Cosmos standard (that request an organic composition of 20% in a final product) etc…

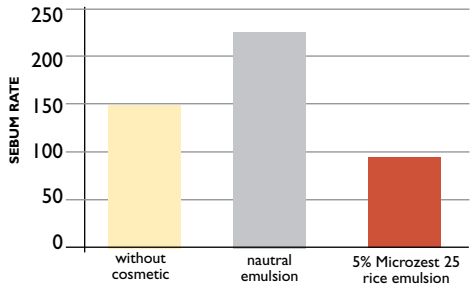
Innovation for dry shampoo

Thanks to its sebum absorption capacity, **Microzest 25 rice** is an ideal ingredient to formulate dry shampoo.The particles sizes dispersion allows perfect flow of the powder through all the orifices of aerosol delivery system and present a good dispersion of the powder in aerosol without agglomeration. Furthermore, **Microzest 25 rice** used in dry shampoo participates to obtain a volumizing and texturizing effect.

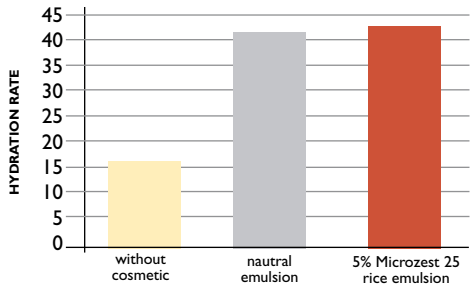
Sebum absorption In vivo study

Sebum absorption capacity without dehydration and with a long-term effect

SEBUM RATE DECREASES AFTER APPLICATION OF A CREAM THAT CONTAINS 5% OF MICROZEST 25 RICE



MICROZEST 25 PRESERVES THE SKIN HYDRATION DESPITE THE SEBUM ABSORPTION



COMPARISON WITH A REFERENT : GREEN CLAY SEBUM ABSORPTION CAPACITY

with a long term effect even after 3 hours, whereby it rises again with clay
