Flowers

A symbol of softness and generosity, flowers offer their coloured petals and spring-like fragrances for delicate skin treatments : a gift in a blaze of beauty.

Rose

200, 500, 1000, 2000 & petals

A symbol of eternal beauty, the rose is a mystic flower which arouses senses with its sweet perfume and the softness and freshness it releases. Roses are especially adapted for dried and delicate skin treatments.
O - S - P

Arctics

Plants from the frozen North appeal thanks to their glowing colours and their precious polar active ingredients which improve skin's appearance and protection.

Cranberries

200, 500, 1000 & 2000

Cranberries grow under harsh conditions and concentrate outstanding active ingredients to enhance skin protection. Polyphenols & tocotrienols act in synergy for a strong anti-oxidant activity while Omega 3 and Omega 6 give optimum moisturizing: ideal for anti-aging treatments.
(A - E) - O - S - P

Coconut

200, 500, 1000 & 2000

Thanks to its filmogen activity, coconut is often used to tone and protect the skin. Releasing a delicate and rich perfume, coconut wraps the skin with a warming exotic fragrance: skin is softened. Its dark particles give the products an ethnic and strong exfoliating power.
A - E - O - S - P

Cocoa

200, 500, 1000 & 2000

Considered as a sacred fruit for the Mayas, the Incas and the Aztecs under the name "Gods' food", it is now a "Gods' gift" for cosmetics. Cocoa bean shell is rich in theobromine, a lipolytic molecule with draining and detoxifying properties. It is a wonderful energizing source with its high content of β -phenylethylamine, the "love molecule"; one also loves chocolate for the feeling of well-being and comfort that it gives to skin.
A - E - O - S - P

Guarana

200, 500, 1000 & 2000

In tropical forests, guarana is collected by farmers, making it an ideal ingredient to elaborate ethical scrubbing products which could benefit from the "fair trade" certification. Extremely rich in theobromin and guaranin, it has a strong lipolytic activity with stimulating and energizing properties.
(A - E) - O - S - P

Pomegranate

500, 1000 & 2000

Pomegranate seeds are well adapted for scrubbing as their natural hardness confers them some strong exfoliant properties. Pomegranate seeds are known for their anti-oxidant properties.
A - E - O - S - P

Mediterranean

*Inspired by South France fruity & oily wealth,
Mediterranean fragrances awake senses while
the Provençal active ingredients nourish and moisturize the skin.*

Citrus 500, 1000 & 2000 - (A - E) - O - S - P

Lemon: yellow lemon peel favours local peripheral circulation, stimulates supporting tissue regeneration and has a whitening effect on the skin.

Orange: as vitality's symbol, the sweet orange is a vitamin cocktail (especially vitamins A, C & P) which prevents the skin aging process.

Bitter orange: Flavonoids & vitamin C are real anti-oxidant and anti-inflammatory agents; essential oils make bitter orange an excellent skin tonic which also improves dry skin.

Argan

200, 500, 1000 & 2000

Argan oil is extracted from argan tree fruits in respect with fair trade philosophy: a precious ingredient for natural cosmetics, especially appreciated during hammam treatments.

A - E - O - S - P

Apricot

200, 500, 1000 & 2000

Originating in Iran and cultivated in China for 4000 years, the apricot tree is believed to come from Armenia: hence its name "Prunus armeniaca". We find now apricots in temperate and Mediterranean Europe. Apricots are rich in vitamins A, B and C, sugars, mineral salts and various tonifying trace elements: a popular scrubbing agent, apricot is widely used in cosmetics to deeply clean the pores while gently removing dead skin cells.

A - E - O - S - P

Grape

500, 1000 & 2000

Inspired by a 100-year old Mediterranean tradition, vinotherapy is recognized as one of the most effective natural therapies to protect and revitalize the body; the vine fruit has become essential in contemporary skin care. Grape seeds contain high levels of polyphenols (OPCs, anthocyanins) which act in synergy for a potent anti-aging activity. The high anti-oxidant content associated with vitamins and acid fruits, make the grape ideal for soft exfoliating care or protective treatments.

A - E - O - S - P

Olive

200, 500, 1000 & 2000

Once grinded and well sieved olive stone make almost spherical granules which allow a gentle exfoliation. They can be associated with olive oil to rehydrate and regenerate the skin. Olive tree is also a symbol of strength, long life, peace and fertility, a miraculous painkiller remedy for the athletes of ancient Greece.

A - E - O - S - P

Walnut

200, 500, 1000 & 2000

Walnut is the fruit of a large-tree cultivated in Grenoble area in the french Alps. Once gathered and dried, walnuts are sorted to separate the fruit from the shell. The shell is then finely ground to get a sand-like powder which is made of homogeneous granules.

A - E - O - S - P

Asian

*With its expertise in the art of massage,
Asia has become a sanctuary of serenity.
Asian plants embody this peaceful spirit with
relaxing properties and heady fragrances.*

Lychee

200, 500, 1000 & 2000

Also called the "Chinese cherry", the lychee is ideal for exfoliation:

- Well-known for its extreme sweetness, the lychee fruit is rich in proteolytic enzymes which eliminate dead cells.
- The kernel's resistance allows strong scrubbing cares preparation for an accurate gesture.

A - E - O - S - P

Bamboo

200, 500, 1000 & bamboo 100

Bamboo Exfoliator is a solidified organic silica extracted from the nodes of specific bamboo stems, called "Tabasheer" in the traditional Indian medicine. Bamboo 100 is especially ideal for **MICRODERMABRASION** since it improves skin refinement and complexion's clearness.

A - E - O - S - P

Rice

200, 500, 1000 & 2000

At home, Thai women make their own scrubs from rice which acts as a gentle natural exfoliant. This cosmetic activity associated to the symbol it conveys (life and abundance's cereal for Asia) make rice the ideal scrub to create softening products with moisturizing and nourishing effects on the skin.

E - O - S - P

Lotus

500, 1000 & 2000

A kind of water lily, the lotus is a sacred plant, known in cosmetics for its astringent and tonifying activities. Its seeds, storing energy reserves, present ideal hardness for an accurate exfoliation.

O - S - P

Lemongrass

500, 1000 & 2000

In traditional Indian medicine, lemongrass was appreciated for its anti-microbial activity. The essential oil, extracted from the leaf, is used to fight against cellulite and to lessen mental fatigue. Lemongrass Exfoliator is manufactured from the leaves and gives an accurate exfoliation.

(A - E) - O - S - P

Luffa

Specific grades & intense colours

A - O - P - S

Luffa (Loofah) is a member of the Cucurbitaceae family. Its fruit contains hard fibers ideal for exfoliation. Fibers are grinded into fine and homogeneous particles producing a powder available in 7 intense colours.

Possibility to choose the grade:

- Luffa 30: fine grade for cosmetics.
- Luffa 20: medium grade for cosmetics, soaps.
- Luffa 5: long grade for bar soaps.

Minerals

From the depths of the earth, rare and precious ingredients have inspired alchemists in their search for eternal beauty secret. Now skin is seduced by their energizing power and boosting micro-circulation activity: a true elixir of youth.

Rhyolite (Si/Al) 75 & 200

Extremely abrasive, rhyolite is a low density lava rich in silica (71%), formed in Lipari islands volcanoes' magma. Processed into a very fine powder, Rhyolite Exfoliator allows a tonic exfoliation. Such a mineral is ideal to regenerate skin and to smooth the epidermis without affecting the hydro-lipidic surface.
A - E - O - S - P

Lithothamnium (Ca/Mg) 500

Lithothamnium is a red coral plant highly rich in calcium (30-35%) and magnesium. Its marine origin makes it a revitalizing mineral treasure gathering more than 32 trace elements in a readily available form. Its hardness also ensures energetic exfoliations.
(A - E) - O - S - P

Garnet (Si/Fe) 100, 200 & 300

Semi-precious stone, the Almandite Garnet used in Garnet Exfoliator is known for natural hardness and abrasive characteristics. It is especially rich in iron (30%), essential for the body's well-being. Associated with silica and aluminium, these minerals act in synergy for a powerful regenerating and energizing experience.
A - E - O - S - P

Pearl (Ca/Mg) 100, 200 & 500

The mother-of-pearl is alternatively formed with layers of aragonite and conchiolin organized around a nucleus. Thus, both mineral and organic, it especially activates micro-circulation and gives brightness to the face; with sparkling particles, it gives cosmetic scrubs a deep precious image which is pure luxury for the skin.

Special

SPECIAL MICRODERMABRASION

Bamboo Exfoliator 100 & Corindon Exfoliator 100
*The fashionable skin-freshening
and skin-renewing technique - A - E - O - S - P*

Bamboo Exfoliator 100, natural silica extracted from bamboo sap, effectively exfoliates smoothly the surface layer of the skin to reveal renewed, refreshed and younger-looking skin. The particle size dispersion is really accurate, between 50 to 100µ which is suitable for a daily and soft exfoliation.

Corindon Exfoliator 100 is manufactured from Corundum, a crystalline form of aluminium oxyde, which is as hard as the diamond.

HOW TO CHOOSE YOUR EXFOLIATOR

Particles size:
according to use and body part to treat.

Grade 2000.....	1000 µm - 2000 µm

Grade 500.....	200 µm - 500 µm
Grade 300.....	200 µm - 300 µm
Grade 200.....	100 µm - 200 µm
Grade 100.....	100 µm
Grade 75.....	75 µm

(Grade 75, suitable for MICRODERMABRASION)

Galenic form:
textures compatible
with our ingredients.

The Bio cosmetics revolution

Shifting towards organic products is not just a fashion-driven behaviour but a true worldwide movement gaining ground in all industries sensitive to deep environmental and human values.

On the European cosmetics market, natural and organic products have been expanding by over 20% annually for the last 5 years. Pioneering brands show the highest growth rate, from 40% to 70%.

Natural cosmetics have evolved since they were born in the 1980's. Now, Bio rhymes also with pleasure, diversity and safety: formulations effectiveness combines with sensorial textures.

Lessonia offers the market its expertise in processing natural raw materials and its know-how in environment-friendly practices, both supported by values that cultivate a sustainable economy and culture.

Natural or Organic?

Lessonia provides the market with 2 proposals depending on the natural approach brands choose to follow, each providing with outstanding formulations, innovative galenic forms, rich fragrances, acidulous colours, fresh and sensual textures...

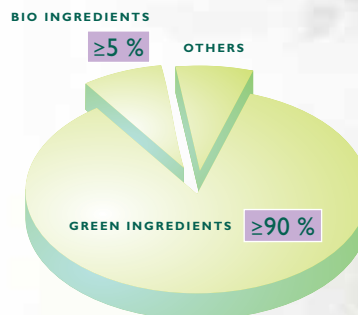

- Natural trend with **GreenExfoliator**, 100% natural, gamma ray free and organic approved: can be used in an organic formula as a vegetal ingredient for the plants and as a natural ingredient for the minerals. Dedicated for the nature sensitive brands and the organic certified formulas.
- Bio trend with **BioExfoliator**, coming from organic farming, gamma ray free and organic certified: one step further, for truly organic products ranges for the most demanding brands. Can be used in an organic formula as an organic certified ingredients.

GreenExfoliator and BioExfoliator are approved by the major current certifiers, making them organic compliant ingredients on a worldwide scale.

Focus

Organic certified product requirements

To get the bio certification, a product must concentrate at least 95% of natural ingredients, part of them coming from organic plants. Both **GreenExfoliator** and **BioExfoliator** offer possible certification.

Creativity remains at the heart of our business:
each of our customers is unique.

*Lessonia supplies the cosmetics industry with more than 150 Exfoliator®.
This range is promoted all over the world thanks to distributors who help us
give each brand its own identity and personalized project developments.*

We research promising ingredients
to create outstanding textures
meeting your brand requirements.

Coffee, Walnut, Lemongrass, Lichen, Cade, Star anise, Blackcurrant, Raspberry...
