

FACE

Innovation in natural ingredients processing leads to the creation of exclusive facial treatments

Peel-Off Catalogue

The Peel-Off Mask are used to provide efficient facial and body cares. Their action is quite outstanding as the product, applied as a paste will rubberized after few minutes. This is just a natural process permits by the alginate extracted from some seaweeds.

Directions for use

Add water on the powder at room temperature. Mix vigorously to get an homogeneous paste Apply it immediately on to the skin and leave it performing its action during 15 minutes. After few minutes the mask sets and can be easily peeled off after the care.

Ajouter l'eau sur la poudre, puis mélanger vigoureusement pour obtenir une pâte homogène. Appliquer là et laisser agir le produit. Après quelques minutes, le masque prend et se retire facilement comme une seconde peau après le soin.

Peel-Off mask – popular masks for facial care

Peel-Off masks are widely used during facial cares by aesthetician in beauty salons. The main action of these masks consists in activating the microcirculation and in opening up the pores of the skin encouraging active ingredients penetration.

Les masques peel-off sont très souvent utilisés par les esthéticiennes pour proposer des soins visages. Leur principale action consiste à stimuler la microcirculation et à ouvrir les pores de l'épiderme, permettant ainsi une pénétration accrue d'ingrédients actifs apportés durant le soin.
