

BlackCurrant EXFOLIATOR

actifs exfoliants naturels

An explosive purple powder promoting skin's healthiness and youthfulness

Blackcurrant (Cassis in French) is a commune of the Bouches du Rhones department in southern France

A fragrant purple powder adapted to any formulations

BlackCurrant Exfoliator is a dark purple powder which is manufactured from the fruit's marc, rich in pulp and seeds. This powder is very stable and adapted to any formulation type (cream, gel, paste, powder, soap bars). According to the particle's size, the exfoliation process will be more or less powerful.

Une poudre violette très odorante adaptée à toutes les textures

BlackCurrant Exfoliator est une poudre violette obtenue à partir de marc de cassis, riche en pulpe et graines. La poudre est d'une grande stabilité et adaptée aux diverses textures (crème, gel, pâtes, poudres, savons). Selon la taille des particules, l'exfoliation est plus ou moins énergique.

BlackCurrant Properties

The Blackcurrant berries pulp show a high level of anti-oxidant activity, thanks to its richness in anthocyanins. These ones are beneficial in neutralising the free radicals which damage DNA human cells. The seeds contain an oil rich in Gamma Linoleic acid (Omega 6) which promote healthy, youthful and glowing skin.

La pulpe des baies de Cassis présente une activité anti-oxydante élevée, due majoritairement à sa richesse en anthocyanes, composés capables de neutraliser les radicaux libres responsables de la détérioration de l'ADN des cellules. Les graines contiennent une huile riche en acide Gamma Linoléique (Oméga 6) qui aide à rajeunir et faire briller la peau.

4 kinds of Exfoliation

BlackCurrant Exfoliator is available in different sizes so as to be integrated in various projects.

Selon le projet, BlackCurrant Exfoliator est disponible sous différentes fractions granulométriques.
