PEEL OFF MASK

BASE FOR FACE

Item Code: H206

Peel-off masks are essential for facial care

Peel-Off masks are widely used during facial cares by aestheticians in beauty salons. After the mask treatment the skin is moisturized, soothed and refreshed.

Lessonia offers a wide range of Peel-Off Masks. For each kind of treatment and skin there is a designed mask. The manufacturing process is based on the best quality grade of alginate and very natural ingredients.

Properties of Alginate

The base peel-off mask contains alginate which is an anionic polysaccharide distributed widely in the cells of brown algae, in fresh waters, where it forms a viscous gum. Thus, alginate allows the masks to perfectly fit into the shape of the face and body.

Directions for use

Use: 30 g powder + 90 g water

Add water to the powder at room temperature. Mix vigorously to get an homogeneous paste. Apply it immediately on to the skin and leave it performing its action during 15 minutes. After few minutes the mask sets and can be easily peeled off.

Main ingredients

Algin - Diatomaceous earth
Tetrasodium pyrophosphate
Calcium sulfate
Active ingredient: Alginate

Packaging

Bulk: 18 kg
Bucket: 1 kg
Sachet: 30 g

The Mask Peel-Off Base is manufactured with guluronic alginate. This is the highest quality grade of alginate making the masks very solid. It guarantees to remove it easily in large peace and the success for the aestheticians.

Alginate quickly jellifies when put in contact with water, turning into a texture easily removable at the end of the care. Thus, it is an ideal ingredient in the manufacture of cosmetic products, especially peel-off masks.

This peel-off base mask is the ideal element to manufacture a large range of peel-off masks.
